Internship period: from July 1, 2021 to July 21, 2021

I have read the 11-page internship report of the student of group BPI192, Vitaly Leonidovich Popov.

According to the Individual Assignment for Practice, the student has studied:

1. development of web applications using the React framework in JavaScript;
2. using the Ant Design library;
3. processing client-server requests;
4. Creating a client-side authentication system using JWT tokens
5. Software collection of product information from the Amazon website (Website Parser <https://www.amazon.com/>)
6. Setting up page printing in the browser.

The student solved the following problems:

- Development of a front-end order administration panel for NCahoots Inc
  - Design a page with a list of orders.
  - Edit orders.
  - Export the order list to CSV format. • Implement the output of the wish list in a printable format.
  - Implement the output of a list of photos in a format suitable for printing.
  - Implement a shopping list with editing capabilities.
  - Collect product information from the website <https://www.amazon.com/>.

Brief description of the work and achieved results, quality of execution  
practice assignments

The admin panel was able to accept orders and provide further fulfillment, including processing Amazon product data and printing images.

During his internship, student Vitaly Leonidovich Popov demonstrated his skills as a responsible team leader. He responsibly organized the work of a five-person team, oversaw the assignment and execution of tasks, and ensured the code was functional. Vitaly was on time for all work meetings and was always available.

The practical assignment was completed in full.

Student Vitaly Leonidovich Popov deserves a grade of 10 out of 10.
